BIG DATA: TRANSITION TO PRACTICE

UPDATED PROGRAMME ONLINE

Dear colleague,

The European Association of Systems Medicine (EASyM) is organising the **second International Conference on Systems Medicine entitled "Big Data: transition to practice"**, which will give delegates a flavour of cutting edge research and translation of it to the clinics within the field. The conference is designed to initiate and promote interactions between researchers and clinicians who are interested in applying systems level approaches to address medical problems.

Systems Medicine has emerged as an integrated approach to biomedical research and personalised healthcare allowing for the development of new strategies for individualised diagnosis, treatment and prevention of diseases. To achieve these ambitious goals we need to bridge the gap between experimental data and medical knowledge as well as evaluate both in terms of clinical utility and patient's benefit.

The conference will take place from **7 to 9 November 2018 in Utrecht, the Netherlands** which is famous for its medieval old town (the iconic Domtoren), canals, Christian monuments and a venerable university. The meeting location will be the Muntgebouw ('Mint Building') in Utrecht, the Netherlands. The Muntgebouw is an important historical building, housing the Royal Dutch Mint, where the Dutch coins are pressed. Part of the building was transformed into a venue for events and conferences some years ago.

A selection of the sessions / topics that will be addressed:

- Pre Conference Course: Hands on computational course (separate registration required)
- What to do with the bugs - kill them or eat them
- How to bring data into clinical care - practical implications
- Systems medicine; from the beginning tot the end
- The exposome and systems health
- From patients stratification to novel disease classifications (taxonomy); some recent examples
- Big data from and for the patient

To register and to find out more about the programme, please click the buttons below.

Abstracts can be submitted until 7 August 2018.

We look forward to seeing you in Utrecht in November!

Kind Regards,

Prof. Dr. Timothy Radstake, Chairman of the Scientific Committee

Dr. Charles Auffray, Vice-Chairman of the Scientific Committee
